POINT OF SALE

The importance of effective merchandising

Go is renowned for well-designed products and strong, communicative packaging. How that translates to in-store presentation is also part of our successful brand story.

Be it a counter stand, spinner or custom made display, our POS is supported by 'PlanIT', our own space planning system.

'PlanIT' and in-store promotional material combined with access to our in-house creative team provides the complete service for dynamic and successful merchandising.

PlanIT - Space Planning

Regardless of the in-store fixture, how products are arranged on a merchandising unit radically affects sales performance. For more than 15 years, we have continuously developed our own software system to great effect.

We create a detailed planagramme for each display, where our experienced team analyse the selected range of products relative to the available space. The system automatically selects the best placement for each product to maximise every stands revenue per square foot. In addition, this minimises setup time and reduces ongoing merchandising management.

The benefits of good range planning;

- · Encourage multiple purchases
 - · Easier to merchandise
 - · Maximises visual impact
 - · Proven to increase sales

FROM PLANAGRAMME TO RETAIL SPACE

CREATIVE SUPPORT

From window posters to wobblers, our expert team of in-house graphic designers are always in hand to create branded visuals and animations that motivate consumers and drive sales.
